Teacher's Day

We are delighted to share with you the success of the Teacher's Day organized by our foundation. The event was dedicated to honor the hard work and dedication of our beloved teachers, who are the backbone of our educational system.

Our foundation organized a day full of technological training and artistic and playful activities for the teachers. The event was a great

opportunity for them to learn new skills, share experiences with teachers from different coordinations, schools and foundation staff.

The technology training sessions provided teachers with hands-on experience with the latest educational technology tools and software. Art activities allowed them to unleash their creativity and express themselves through various art forms. The playful activities helped them to relax and have a good time.

We are glad to have organized this event and to have shown our appreciation for the hard work and dedication of our CONAFE Community Educators, their professional development and well-being is very important to us.

Adoption

It is a pleasure to inform you that our generous adopter, Kevin Simon, has once again demonstrated his commitment to rural education by adopting another school, now in the community of Rancho Rio Escondido Los Naranjos. His support will be fundamental to improve the conditions of the school and with it the academic development of children and young people.

This day we had the opportunity to receive the parents' committee, CONAFE Pochutla authorities and of course our generous adopter to sign the collaboration agreements.

We are proud to have Kevin as an ally in our efforts to improve education in this community and grateful for his ongoing commitment to education. We are confident that this will positively impact the lives of students, parents and the community at large.

Joining Forces for Education

On this occasion Bacaanda Foundation and AHAH Foundation joined forces to help the CONAFE school in Barrio Nuevo Toltepec, Pochutla, Oaxaca, to benefit more than 56 students and their teachers.

Donors, staff and volunteers from both foundations, as well as parents, were committed to the same goal, to help improve the education of our children in rural communities. After AHAH finished building and remodeling the CONAFE kindergarten, primary and secondary school in this community, we have incorporated them into our main program, Intelligent Rural School, providing

them with satellite internet, smart TVs, iPads with software that reinforces Spanish and Mathematics in basic education through applications and interactive content.

This has been a significant step in providing the students of Barrio Nuevo Toltepec with access to quality education. We believe that all children deserve access to the best education possible, regardless of where they live.

The community is grateful to both foundations, donors and volunteers for their support in making the dream of a better education for their children a reality.

We are delighted to have formed a new alliance for education and to have made new friends in the effort to help the children of Barrio Nuevo Toltepec. Working together, we can positively influence the lives of many children, and we look forward to continuing to forge partnerships that will help us expand our area of impact.
